CYBERSECURITY ESSENTIALS

COURSE OVERVIEW

Employees are often the weakest link in an organization's cybersecurity defenses. Cybercriminals exploit human vulnerabilities through techniques like social engineering, phishing, or spear-phishing attacks. By upskilling in cybersecurity, employees can learn to prevent, recognize and respond appropriately to suspicious emails, links, or requests, reducing the likelihood of falling victim to such attacks.

Upskilling employees in cybersecurity is crucial for organizations to strengthen their defenses, mitigate risks, and create a security-conscious culture. By investing in cybersecurity training and awareness programs, organizations can empower their employees to be active participants in protecting sensitive information and reducing the likelihood of successful cyberattacks.

LEARNING OUTCOMES

At the end of this training, participants will be able to:

- Identify different threats.
- Facilitate information and various tools to prevent cyber threats.
- Protect, backup, and encrypt data to prevent leak.

TARGET

Non-IT personnel who are using smartphones, tablets and all ICT equipment to manage data and to connect to Internet for work. The course requires some basic computer skills (e.g Windows 10/11, browsers and Internet), but does not require any programing language knowledge.
